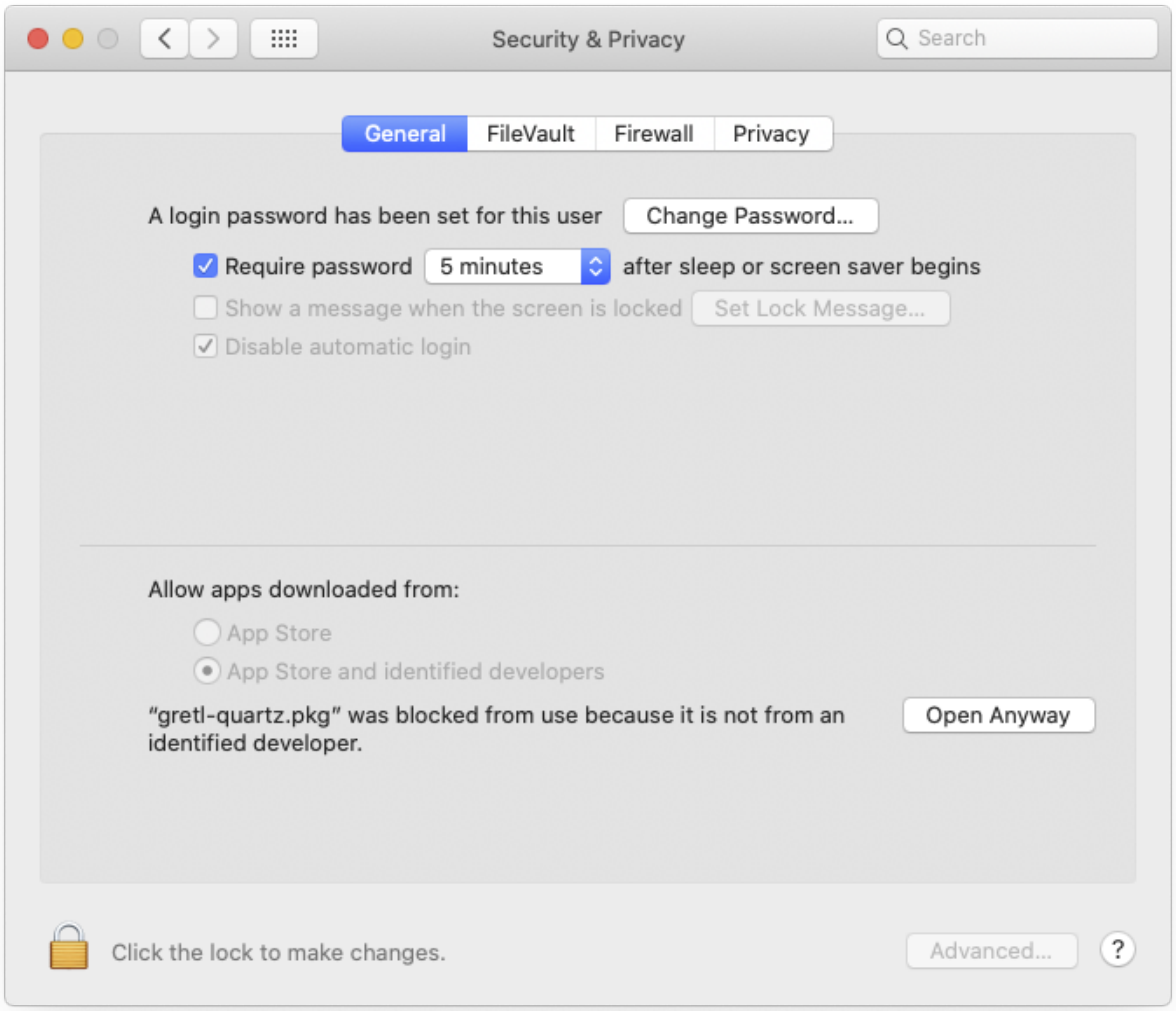
Mac Osx Where Start Apps



[Mac Osx Where Start Apps]

Download

Native Mac apps built with Mac Catalyst can share code with your iPad apps, and you can add more features just for Mac.. There's never been a better time to turn your iPad app into a powerful Mac app.. Apps built with Mac Catalyst can now be fully controlled using just the keyboard, access more iOS frameworks, and take advantage of the all-new look of macOS Big Sur.

1. where to start developing apps
2. where is all apps on start menu

In macOS Big Sur, you can create even more powerful versions of your apps and take advantage of every pixel on the screen by running them at native Mac resolution.
